Taking an Oral Temperature  
1. Using the diagram on the right, place the probe tip under the tongue as near as possible to the heat pocket. The diagram also shows the temperature variable not placing the tip in the heat pocket.  
2. The current temperature is shown and the lower right corner will stop flashing and the thermometer will sound four sets of five quick beeps.  
3. To turn the unit off, press the POWER button. The unit will automatically shut off after approximately nine minutes.  
4. Press the POWER button (the unit will beep) to activate the thermometer.  
5. Reattach the battery protection cap.  
6. Carefully slide the electrical component back into the thermometer casing.  
7. Dropping or subjecting your thermometer to strong shocks should be avoided.  

Taking an Axillary Temperature (under the arm)  
1. Wipe the underarm with a dry towel.  
2. Place the probe tip on the underarm, not the underarm itself. Make sure the tip is touching the skin with the thermometer perpendicular to the body.  
3. Position the arm across the chest so the probe tip is well covered by the armpit. This also assures the probe is not affected by the room’s air.  
4. When the peak temperature has been reached, the C will stop flashing and the thermometer will sound four sets of five quick beeps.  
5. To turn the unit off, press the POWER button. The unit will automatically shut off after approximately nine minutes.  

General Care  
1. The thermometer should only be used under the supervision of an adult.  
2. Do not walk, run or talk during temperature taking.  
3. Clean the thermometer before and after each use.  
4. Do not store the unit in the protective case when not in use.  
5. Do not bite the probe.  
6. Do not store the unit in a location where it will be exposed to direct sunlight, dust or humidity. Avoid extreme temperatures.  
7. Do not attempt to disassemble the thermometer or to make repairs.  

Cleaning Instructions  
1. Clean and disinfect the thermometer according the instructions provided.  
2. Apply a disposable probe cover to the clean, dry thermometer.  
3. Determine whether the measurement site will be oral, rectal or underarm.  

Specifications  
- Display: Liquid Crystal Display  
- Display Resolution: 4 Digits (1/10TH of a degree increments)  
- Average Measurement Time: Oral 45 seconds. Rectal 30 seconds. Axillary 60 seconds  
- Accuracy: ±0.1 °C  
- Weight: 15.5 grams  
- Dimensions: 4-7/8” x 11/16” x 3/8”  
- Storage Temperature: -20 °C to 50 °C  
- Humidity: 15% to 95% RH  
- Power Source: 1.5V AG3 alkaline battery or LR41 silver oxide type or equivalent.  

Limited one year warranty  
This MABIS Digital Thermometer is guaranteed to be free of manufacturing defects for a period of one year from the date of purchase under normal use. This warranty applies to the original purchaser of the product and does not cover damage from any cause other than that which may result from defects in materials and workmanship. All implied warranties, including merchantability and fitness for a particular purpose, are hereby limited in duration to the period of this warranty. This warranty gives you specific legal rights and you also have other rights which vary from state to state.
